

viz for social good – The Growth of a Network

Viz for Social Good empowers mission-driven organizations to harness the power of data visualization for social change. Since January 2017, passionate data professionals collaborated with 29 different social organizations on 31 data visualization projects to tackle critical social issues. For each project, [an international network of volunteers originating from numerous cities](#) around the globe is created. Today, the Viz for Social Good network consists of 324 volunteers from 120+ cities in 33 countries.
